

# Basingstoke Logistics City

Installation of King Post Wall for new industrial units.

**AARSLEFF**

Aarsleff Ground Engineering was awarded the contract by Kier group for installation of a King Post Wall for a Logistics City in Basingstoke. The Logistics City brand was developed by Kier Property with an aim to offer a unique warehousing in the UK. The brand already has 6 Logistic Cities across the UK, with several more currently being planned or in construction.

Aarsleff was contracted to install 127 L/M of King Post Wall. Using its Comacchio drilling rig, Aarsleff pre-drilled the chalk down to a depth of 5m to ease installation of the 86 No. universal steel columns. The precast concrete interlocking panels were slotted in to raise the existing ground level up to 4m. Aarsleff commenced work on the 3rd April 2018 and had finished the project by the 4th May.

The Basingstoke Logistics City will provide units from 2,100 - 4,600 sq/m, and be located on Houndmills Industrial Estate, providing easy access to the ring road and access to trains to London Waterloo.
